Re: Shelf Life of Material

To Whom It May Concern:

We are providing you with this letter in response to your inquiry regarding shelf life of flexible packaging materials (hereinafter "Packaging Materials") converted by Shannon Packaging.

There is no industry standard for shelf life of Packaging Materials. Based on our experience and the general experience of our customers, we believe the shelf life of our Packaging Materials to be 1 year from the date of manufacture, depending on the specific product and numerous other factors.

Some common concerns regarding old rolls are:

- Telescoping
- Discoloration
- Brittleness
- Delamination
- Poor Sealability

We recommend the following guidelines for storage of Packaging Materials to ensure optimum material performance:

- Stored on pallets stacked no more than two high
- Proper orientation of the case (indicated by the arrow on the box)
- Keep away from heat sources and direct sunlight
- Recommended storage conditions are cool, dry environment

This letter has been provided for information purposes only. The above guidelines are based upon our industry experience and do not constitute any guaranty or warranty of the Packaging Materials regarding shelf life. Shannon Packaging's standard terms and conditions apply to all Packaging sold. Shannon Packaging specifically excludes any warranty or merchantability or fitness for a particular purpose.

Shannon Walsh
